

Grade 1 Halves and Fourths

Fractions • Grade 2 • Drill • Set B

Name: _____

Date: _____

Equal parts of a whole. Write the fraction or the word that answers each question.

1. A paper strip is folded into 4 equal parts. What is one part called? (Write the word.)

2. How many halves make one whole?

3. Which is bigger: $\frac{1}{2}$ of an apple or $\frac{1}{4}$ of the same apple?

4. A cracker is cut into 4 equal parts. What fraction is 1 part?

5. An orange is cut into 4 equal parts. You eat 1 part. What fraction did you eat?

6. You share 1 apple equally among 4 friends. What fraction does each friend get?

7. A shape is cut into 4 pieces that are NOT the same size. Are they fourths? Write yes or no.

8. A paper strip is cut into 4 equal parts. What fraction are all 4 parts together?

9. An apple is cut into 4 equal parts. What fraction are 3 parts?

10. A circle is folded into 2 equal parts. What is one part called? (Write the word.)

11. How many fourths make one whole?

12. Which is bigger: $\frac{1}{2}$ of a cracker or $\frac{1}{4}$ of the same cracker?

Answer Key

Grade 1 Halves and Fourths — Set B

1. one fourth

5. $\frac{1}{4}$

9. $\frac{3}{4}$

2. 2

6. $\frac{1}{4}$

10. one half

3. $\frac{1}{2}$

7. no

11. 4

4. $\frac{1}{4}$

8. $\frac{4}{4}$ (one whole)

12. $\frac{1}{2}$
