

Grade 2 Equal Groups and Halving

Mixed Operations • Grade 2 • Word Problems • Set B • CCSS 2.OA.3

Name: _____

Date: _____

Break each total into equal groups. Write how many are in one group.

1. 14 is an even number. Split it into 2 equal groups. How many are in each group?

2. 18 is an even number. Split it into 2 equal groups. How many are in each group?

3. 20 is an even number. Split it into 2 equal groups. How many are in each group?

4. 16 is an even number. Split it into 2 equal groups. How many are in each group?

5. 10 is an even number. Split it into 2 equal groups. How many are in each group?

6. 8 is an even number. Split it into 2 equal groups. How many are in each group?

7. 6 is an even number. Split it into 2 equal groups. How many are in each group?

8. 12 is an even number. Split it into 2 equal groups. How many are in each group?

9. Put 20 counters into 5 equal groups. How many are in each group?

10. Put 12 counters into 3 equal groups. How many are in each group?

11. Put 15 counters into 3 equal groups. How many are in each group?

12. Put 20 counters into 4 equal groups. How many are in each group?

13. Put 15 counters into 5 equal groups. How many are in each group?

14. Put 16 counters into 4 equal groups. How many are in each group?

15. Put 18 counters into 3 equal groups. How many are in each group?

16. Put 12 counters into 4 equal groups. How many are in each group?
